EXPERIENCE

SaviaHealth | Senior Product Designer

July. 2023 - Present | Dallas, TX

Designed and launched the Incidental Liver Lesions application, utilizing an evidence-based engine to identify and provide care for high-risk patients, resulting in saving $3 millions and numerous lives annually.

Leading the design team in conceptualizing and implementing a novel design language aimed at enabling clinicians to efficiently focus on critical actions within the intensive hospital environment, facilitating goal achievement

Inspirata | Senior Product Designer (Design Lead)

Feb. 2022 - July. 2023 | Dallas, TX

Led the design team to help improve clinical trial matching and cancer registry applications which utilizes NLP capabilities to open up new possibilities for cancer patients and caregivers

Pioneered the development of an in-house design system to address inconsistency issues across products

Twigfarm | UX Designer

July. 2020 - Feb. 2022 | New York, NY

Launched Heybunny, a newsletter app facilitating personalized discovery and barrier-free reading experiences tailored to users' preferences

Led UX initiatives to broaden the newsletter app's appeal among Gen Z users, fostering a habit of transforming daily content into insights

Google | UX Design Intern

May. 2019 - Aug. 2019 | Mountain View, CA

Designed a revamped Google Lens Transit experience catering to 40M tourists, easing transit anxiety through language translation, first-person navigation, and advanced machine perception (AI) and AR functionalities

DocNetwork | UX Designer

Sept. 2018 - Dec. 2018 | Ann Arbor, MI

Engineered an internal health form builder for 13 account managers overseeing an average of 400 profiles each, streamlining medical record accuracy and minimizing errors

TmaxOS Inc. | UX Designer

Jun. 2017 - Jun. 2018 | Seongnam, South Korea

Introduced a novel visualization system for dynamic data, ensuring seamless control, display, and real-time updates of essential information within documents
